TOTAL SCORE

Now that you have completed the Anger Inventory, you are in a position to calculate your IQ, your Irritability Quotient. Make sure that you have not skipped any items. Add up your score for each of the twenty-five incidents.

You can now interpret your total score according to the following scale:

0 - 45: The amount of anger and annoyances you generally experience is remarkably low. Only a few percent of the population will score this low on the test. You are one of the select few.
46 - 55: You are substantially more peaceful than the average person.
56 - 75: You respond to life’s annoyances with an average amount of anger.
76 - 85: You frequently react in an angry way to life’s many annoyances. You are substantially more irritable than the average person.
86 - 100: You are a true anger champion, and you are plagued by frequent intense furious reactions that do not quickly disappear. You probably harbor negative feelings long after the initial insult has passed. You may have the reputation of a firecracker or a hothead among people you know. You may experience frequent tension headaches and elevated blood pressure. Your anger may often get out of control and lead to impulsive hostile outbursts, which at times get you into trouble. Only a few percent of the adult population react as intensely as you do.
